Integrity Flags

0 Integrity Flags for Review

Our system's algorithms look deeply at a document for any inconsistencies that would set it apart from a normal submission. If we notice something strange, we flag it for you to review.

A Flag is not necessarily an indicator of a problem. However, we'd recommend you focus your attention there for further review.

Introduction:

Introduction To Our Project:

This project focuses on designing and developing an e-commerce website tailored to a watch store. The aim is to demonstrate a comprehensive understanding of modern web technologies while applying principles of usability and accessibility. By developing this platform, the project seeks to showcase technical skills in website design and scripting while addressing the functional requirements of an online store. Additionally, it examines how online commerce has reshaped consumer behavior and business practices, particularly in niche markets like the watch industry (Gautam, 2024)

The e-commerce website incorporates features such as a product catalog, a blog section, and interactive elements like forms. The product page will showcase various watch collections, including detailed descriptions, high-quality images, and pricing information. A blog page will explore industry trends and the impact of technology on watch designs and consumer preferences. Furthermore, the website will feature a research section that compares its functionalities with existing platforms, offering insights into unique features and user engagement strategies (Gautam, 2024).

Beyond just functionality, the project emphasizes clean and maintainable code. Adhering to industry standards, the code is structured to separate content, presentation, and behavior effectively. This separation is achieved using HTML for structure, CSS for styling, and JavaScript for dynamic functionality. Maintaining this modular approach ensures scalability and simplifies future updates or enhancements. (Duckett, 2011)

This project is dedicated to developing an e-commerce website for a watch store, demonstrating proficiency in modern web technologies (Duckett, 2011). It highlights how online commerce has transformed consumer behaviour, particularly within niche industries like watches (Gautam, 2024). The website is designed to be user-friendly and responsive, ensuring a smooth experience across devices (Duckett, 2011). Additionally,

the project focuses on integrating accessibility features, making the platform inclusive for all users. (Dobbs, 2025)

HTML

Figure 1 HTML

Introduction

Hyper Text Markup Language serves as the foundation of the website, providing a structured framework to organize content effectively. It uses semantic tags like `<header>`, `<section>`, and `<footer>` to define the layout, improving accessibility and ensuring that the website is compatible with search engines and assistive technologies. (Duckett, 2011)

How it was used in our website:

While developing our website different features of HTML was used to provide structure to our website. Semantic tags such as `<header>`, `<footer>`, `<article>`, `<nav>` were used to differentiate distinct aspects of our website. `<header>` and `<nav>` were used for navigation bar whereas `<footer>` tag was used for footer section. `<script>`, `<style>` and `<link>` tags were used to implement internal css and javascript. The most used and useful tag was `<div>`. It was used to segregate unique elements, sections and place them in a container for easy manipulation of their dimensions, positions, backgrounds and many more.

`<button>` tag, as the name suggests it was used to create buttons for several functions such as submitting a form, toggle elements and along with `<a>` tag it was used to reference to another internal page. `<a>` tag was used to reference internal links (navigation bar) as well as external links (brand websites). `<table>` tag was used to align different elements. Since there are better alternatives for aligning items such as “flex”

property of css, <table> was used very rarely.<form> tag was used for contact form as well as customer review along with form validation with javascript.

In conclusion, HTML was used to give a structure to our website, not only structure but it was also used for various other functions such as referencing links, forms etc

CSS

Figure 2 CSS

Cascading Style Sheets is responsible for the visual design and layout of the website, allowing developers to style elements, control typography, and create responsive designs that adjust seamlessly across devices. By separating content from presentation, CSS makes it easier to maintain and update the design (Duckett, 2011)

How it was used in our website:

CSS was the most fun and rewarding to use. Seeing our site slowly change from a skeleton to a beautiful looking site was glorious

That being said, it was used to manipulate colours, fonts, font-size, animations, transitions and many more. CSS introduced classes to our website which helped in differentiating one division from another, Class was used to change properties of specific element(s). We used “display:flex” a.k.a(also known as) flexbox property the most to manipulate the positions of different divisions and align them to our needs.

Different transition properties, timings, pseudo elements/classes were used accordingly :hover, ::before, ::after were used to give effects when a user hovers over an element such as an item in navigation bar changing colors, changing scale(size) of an element

when hovered, images blurring when hovered was achieved using :hover and “filter:blur()” property.

@fontface was used to import downloaded fonts into the site. The said fonts were used throughout the site.

In conclusion, css was used to give a good look, enhance user experience and manipulate different properties of elements.

JS(Javascript)

Figure 3 JAVASCRIPT

JavaScript adds interactivity and functionality to the website. It enables features such as form validation, dynamic content updates, and enhanced user experiences through client-side scripting (Dobbs, 2025)

How it was used in our website

JS was used to add functionality to our site. Different functions were used for different things such as form validation, image slider, toggling iframes/elements and many more. Keywords like var, let and const were used to create different varieties with different scope. .querySelector and getElementbyId were used to access elements with certain ids.

Different inbuilt functions such as .toggle(), .setInterval() were used for their specific purpose such as .toggle toggles the class name if used with.classList, setInterval() keeps calling the functions in set time.

Aims And Objectives:

The main objectives of this project are as follows:

- I. Develop a user-friendly, multi-page website that caters to the requirements of an e-commerce platform
- II. Utilize technologies such as **HTML5** for structure, **CSS3** for styling, and **JavaScript** for dynamic functionalities
- III. To ensure the website adheres to accessibility and usability standards, providing seamless navigation and intuitive design for users
- IV. To incorporate research that compares this website with existing platforms, highlighting innovative features and identifying areas for improvement

Verdict:

This project demonstrates the understanding modern web technologies. It showcases how **HTML**, **CSS** and **JavaScript** were used while developing the site. The project is structured around an e-commerce website focusing on a watch store with clear objectives and a robust development plan. By leveraging tools such as VS Code, Balsamiq, Adobe Photoshop etc the project ensures efficient workflow and adherence to the coursework requirements. The next section will delve into the design and implementation process.

DEVELOPMENT

Tools Used:

The following tools were utilized during the development process:

1. **VS Code:** This versatile code editor was used for writing, editing, and debugging the code efficiently. Its extensions and built-in tools streamlined the development process.
2. **Balsamiq:** A wire-framing tool used to create the structural layout and design mockups of the website. This ensured a clear visual plan before actual development commenced.
3. **Adobe Photoshop:** This tool was used to design high-quality images, edit images and visuals for the website.
4. **Note taking tools:** Apps such as notepad and notion were used to note different references and things-to-do list for better time management.
5. **Image Resizer:** Image resizing website [Image Resizer](#) was used to resize the images to reduce file sizes and fix aspect ratios of images.

I. Pages

A. Homepage

The homepage consists of different elements and sections such as the navigation bar, homepage banner, image slider. The wireframe created with balsamiq helped in shaping the layout of the page.

a) Navigation bar:

It consists of logo, navigation links (home, products, blog, research, and about us) and a login button.

Semantic tag <nav> was used to separate navigation bar. <div> tag was used to make a container for navigation items. The elements were aligned using “display:flex” property.

b) Welcome banner:

It consists of a video, a message welcoming the users and a link to product page.

<video> tag was used to display video with additional properties like autoplay loop and muted. There is an overlay above the video which dims the video slightly and welcomes the user and also provides a link to the product pages

c) Featured images:

It consists of images sliding and displaying different featured products. The images are sliding using a JavaScript function. Each image links to the specific product page of the product displayed

d) Overviews

This section of the website gives an overview of different pages: product, blog, research and about us. The overviews were aligned using flexbox

e) Footer

This is the footer section. It is present in all pages of the website. Semantic tag <footer> was used for better readability and “display:flex” was used to align different sections of footer such as company details, services and social media links

Wireframe(s): Homepage

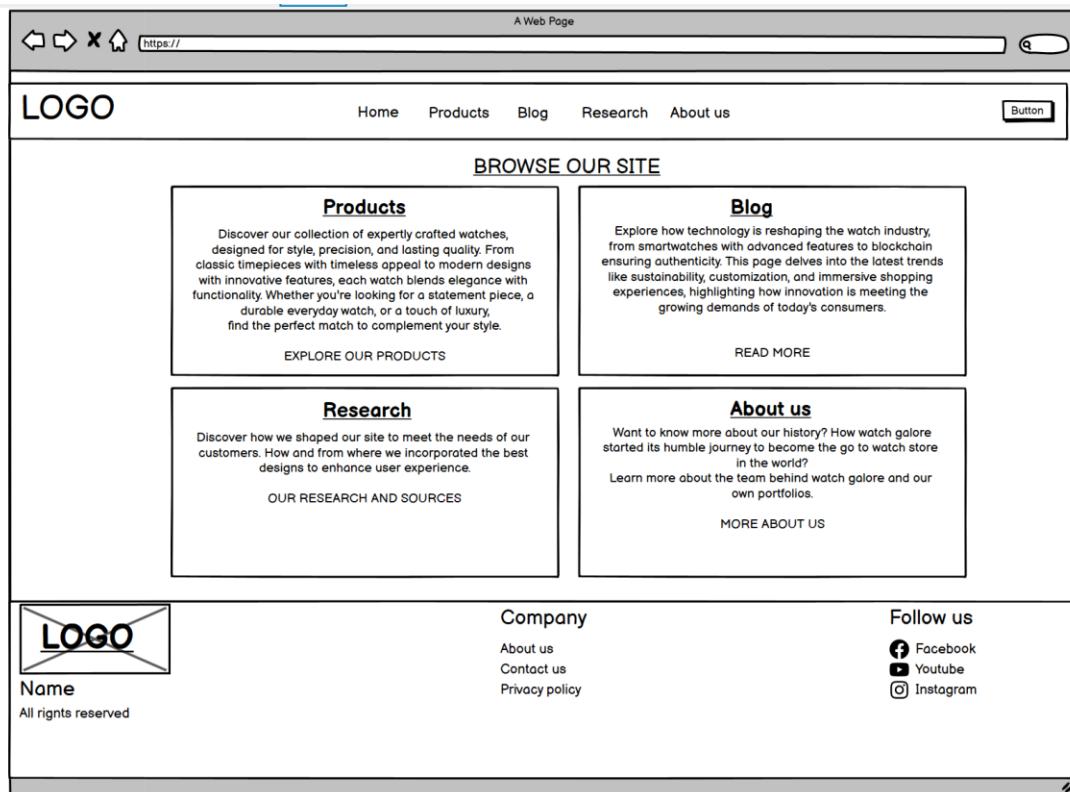

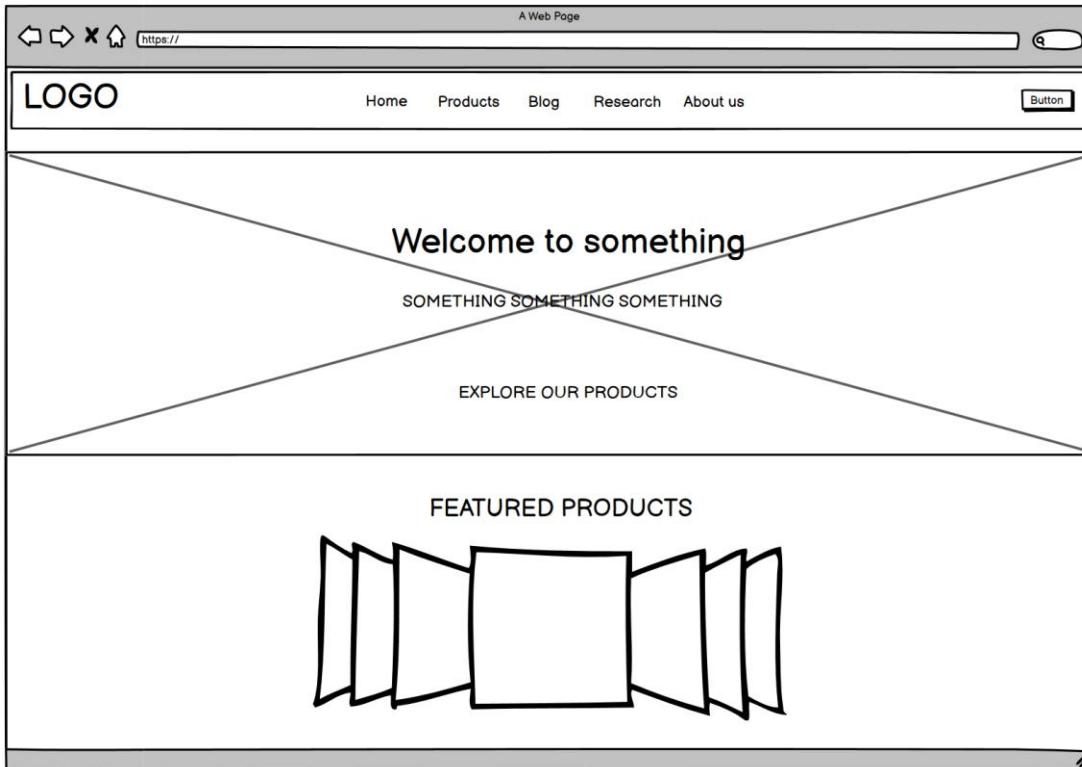

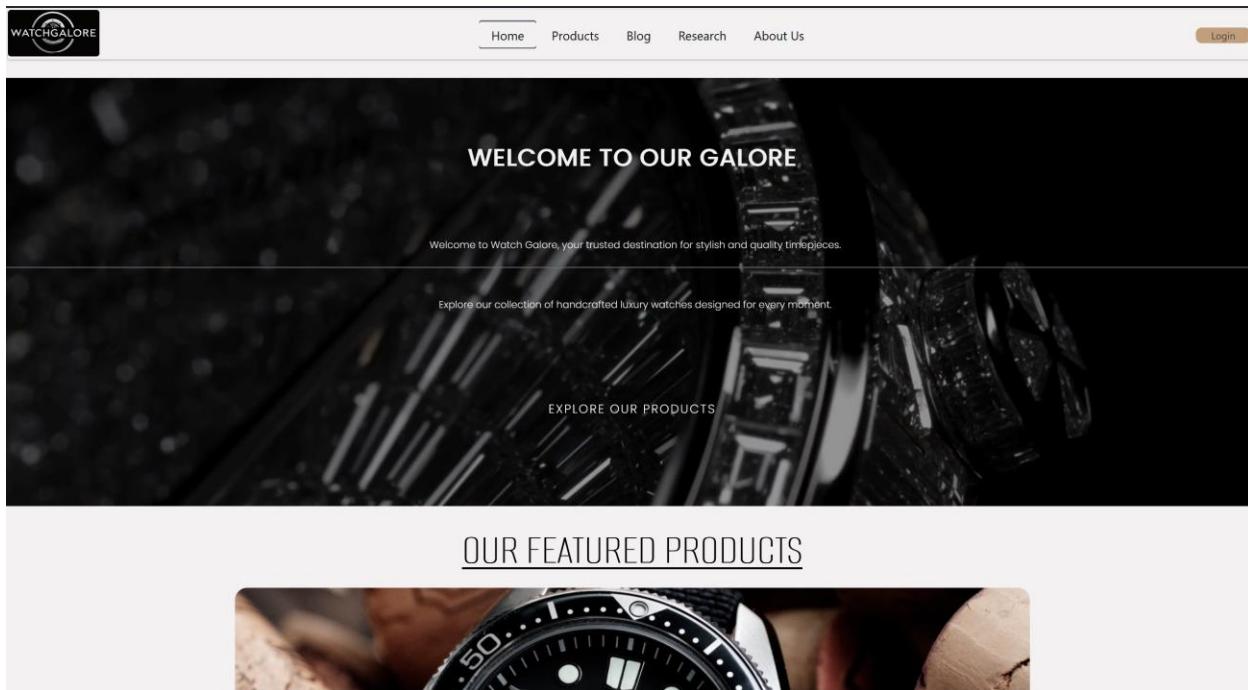

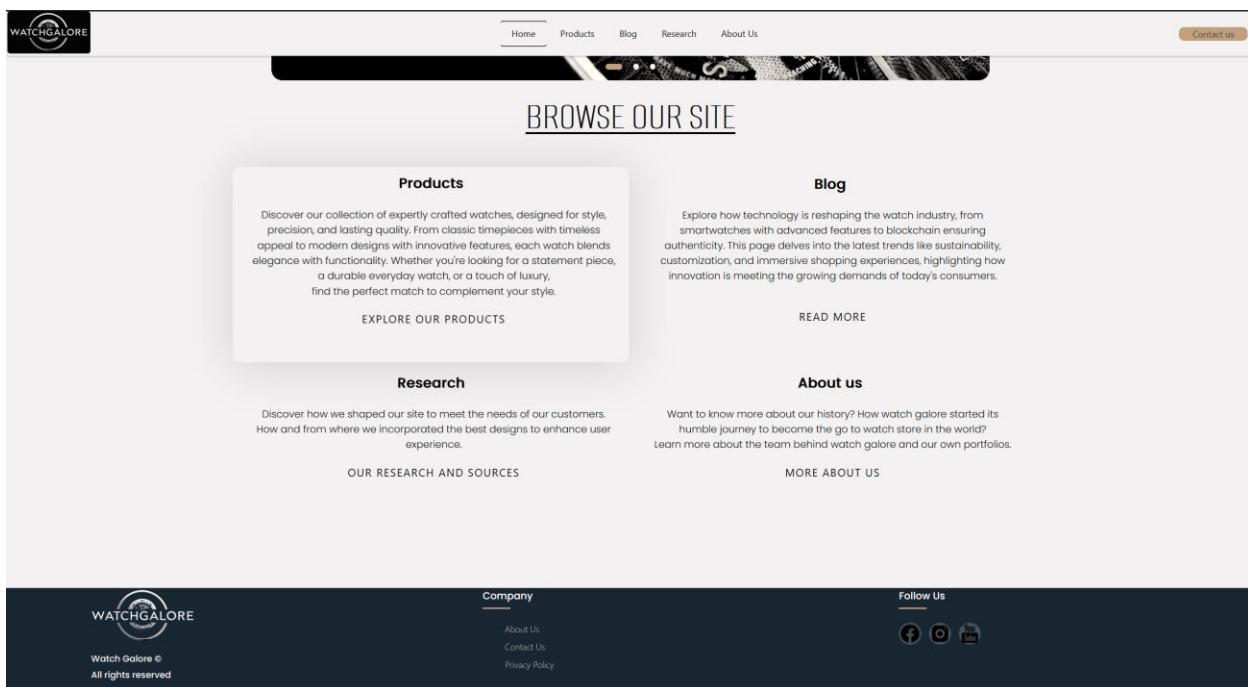

Figure 4: Homepage Wireframe and Actual

Actual Homepage

Homepage(overview and footer)

B. Products page(s)

The main product page displays three categories a user can browse through. Men's watches, women's watches and smartwatches. When a user clicks on one of the categories the user is taken to the specific category.

 tags were used to insert different images. When any category is hovered the image blurs and displays the name of category(example: MEN). The user can click any of the images and it directs them to a specific category page

Product specific page:

The product specific pages has a container with different products displayed in a grid. The products are aligned using “display: flex” property. <div> tag was used to contain specific product cards and and tags are used to display the original and discounted price of the products.

Product cards:

The product card consists of a container with product image, name, discounted price, ratings and buttons to add to cart and go to product's description page.

Wireframe(s): Product page

Main product page

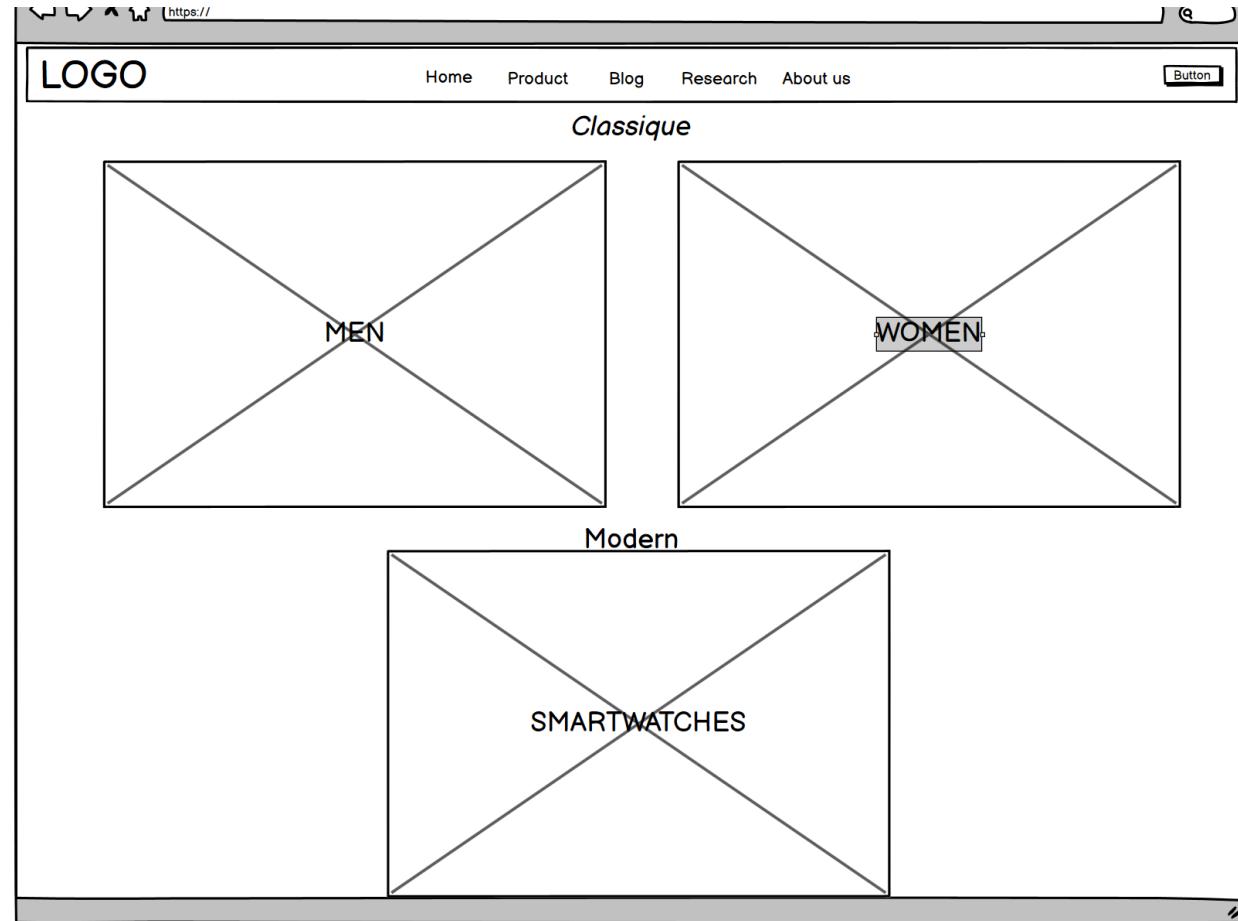

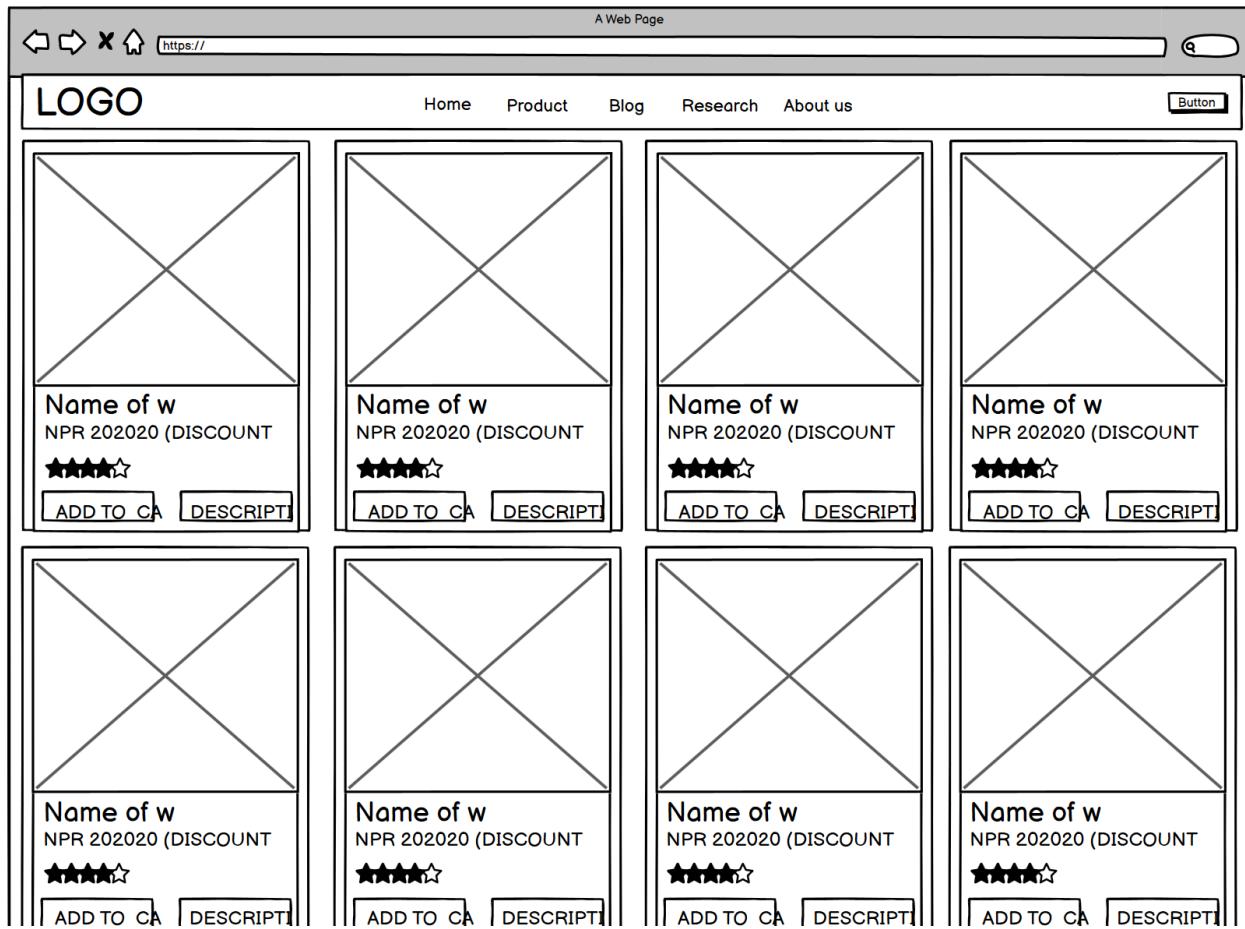

Figure 5: Product page Wireframe and Actual

Product page (inside category)

Actual Product page

The screenshot shows the WatchGalore website with a navigation bar at the top. Below the navigation, there are two main sections: "Classique" and "Modern". Each section features a large, high-resolution image of a watch. The "Classique" section shows a gold-toned chronograph watch with a black dial and a leather strap. The "Modern" section shows a blue-toned smartwatch with a circular face and a metallic bracelet.

Category product page

The screenshot shows the WatchGalore website's category product page for the "Historique" category. It displays five different luxury watches, each with a small image, the name of the model, price, rating, and two buttons: "Add to cart" and "Description".

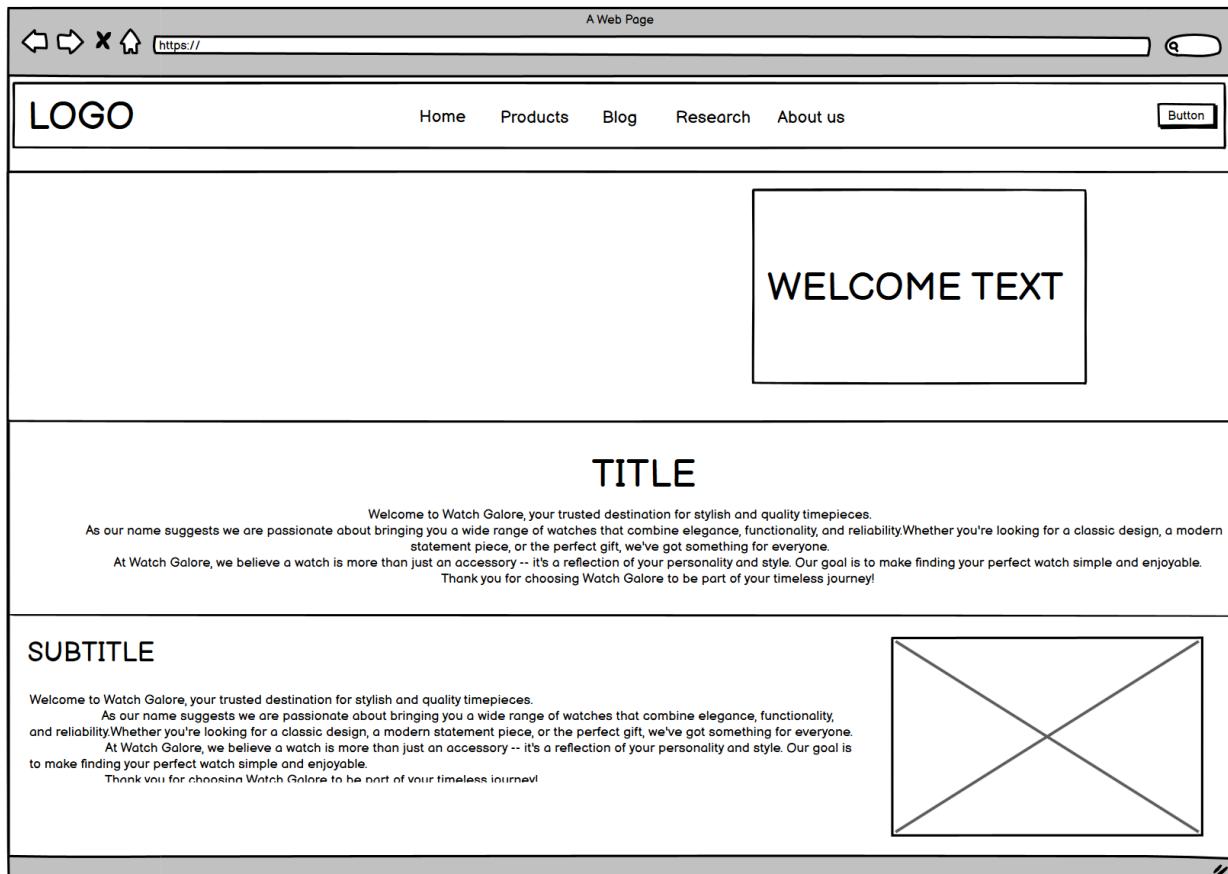

Model	Price	Rating
Historique	NPR 300000 169999	★★★★★ (5)
Traditionnelle Twin Beat	NPR 1500000 1300000	★★★★★ (7)
Tourbillon Retrograde	NPR 40000	★★★★★ (69)
Fiftysix	NPR 600000 560000	★★★★★ (36)
Super Chronomat	NPR 1000000 800000	★★★★★ (200)

C. Blog page

The blog page has a banner with a text “The Galore Blog”, The content of the blog discusses about the impact of technology on watches and how it has influenced the global watch market and its positive and negative impacts.

The content is separated using horizontal rules and headings and subheadings. Images appropriate to topics are placed in different alignments. The image and texts are aligned using “float” property. The different sections are divided using `<div>` tag. `<p>` tag is used to differentiate paragraphs, `<h>` tags are used to provide headings.

Let's explore how this convergence of innovation and

The watch industry, once rooted in tradition and craftsmanship, is now undergoing a remarkable transformation driven by technological innovation. From smartwatches to blockchain verification, technology is not only reshaping watch design and manufacturing but also redefining how consumers interact with timepieces. Let's explore how this convergence of innovation and timekeeping is revolutionizing the industry and meeting evolving consumer expectations.

Smartwatches: Redefining Timekeeping

Watches are no longer mere timekeepers—they've become digital companions. Smartwatches have revolutionized the purpose of wearing a watch, combining utility with cutting-edge technology. With features like fitness tracking, sleep monitoring, and smartphone integration, smartwatches cater to the needs of an increasingly connected lifestyle.

Shift in Consumer Behavior

Tech-savvy buyers, especially millennials and Gen Z, are gravitating toward watches that offer more than just aesthetics. The ability to merge style with functionality has fueled the smartwatch boom, making them a staple in modern wardrobes.

D. About Us page

The page has a section with brief introduction about the company followed by introduction to the team behind the company. Different sections are separated using horizontal rule.

The section “MEET OUR MEMBERS” has pictures of the team members and their name. The members are aligned using flexbox property. The pictures are clickable with toggles the CV of different members. The CVs are displayed using <iframe> tag which initially has display set to none.

ABOUT US

Welcome to Watch Galore, your trusted destination for stylish and quality timepieces.

As our name suggests we are passionate about bringing you a wide range of watches that combine elegance, functionality, and reliability. Whether you're looking for a classic design, a modern statement piece, or the perfect gift, we've got something for everyone. At Watch Galore, we believe a watch is more than just an accessory -- it's a reflection of your personality and style. Our goal is to make finding your perfect watch simple and enjoyable.

Thank you for choosing Watch Galore to be part of your timeless journey!

OUR TEAM

Behind Watch Galore is a team of small but passionate individuals united by their love for watches.

We work tirelessly to source the best designs, stay ahead of trends, and ensure every customer finds exactly what they're looking for. Customer satisfaction is at the heart of what we do. Our team is committed to delivering exceptional service, guiding you through your purchase journey, and answering any questions you may have. With years of experience and an eye for detail, we're here to help you make the right choice.

Thank you for choosing Watch Galore to be a part of your timeless journey!

MEET OUR MEMBERS

Shahil Basnet

Erick Pradhan

Papit Ghimire

Subin Sapkota

E. CV page

The page has a section at left with a picture of the member, contact info, education and language proficiency.

It also has a section with profile message from the member , skills and experience.

The skills section demonstrates the level of different programming language of a member such as python, css, html etc.The experience section displays the different companies the member has worked with along with years he worked in. It also displays what kind of achievements the member completed and what position they work/worked in.

Took part in designing and implementing new changes to the website
Designed and implemented various QoL changes and optimized the engine

2022-Present
Senior Datascientist
WATCH GALORE
Worked on designing the company from the ground up
Optimized recommendations for costumers. Worked on collecting and analayzing data to predict new trends

F. Research page

This page contains information about what sites we researched from and what we referenced and why referenced from the site.

The images and information are arranged with table tag. The rows are separated using `<tr>` tag whereas the columns are separated using `<td>` tag. The left column contains image of our website and right column contains image of the referenced website and the row below the images contains reasonings behind referencing the website.

Each image links internally or externally. Images on right links internally and images on left links externally.

2) Test 2: Internal and External link

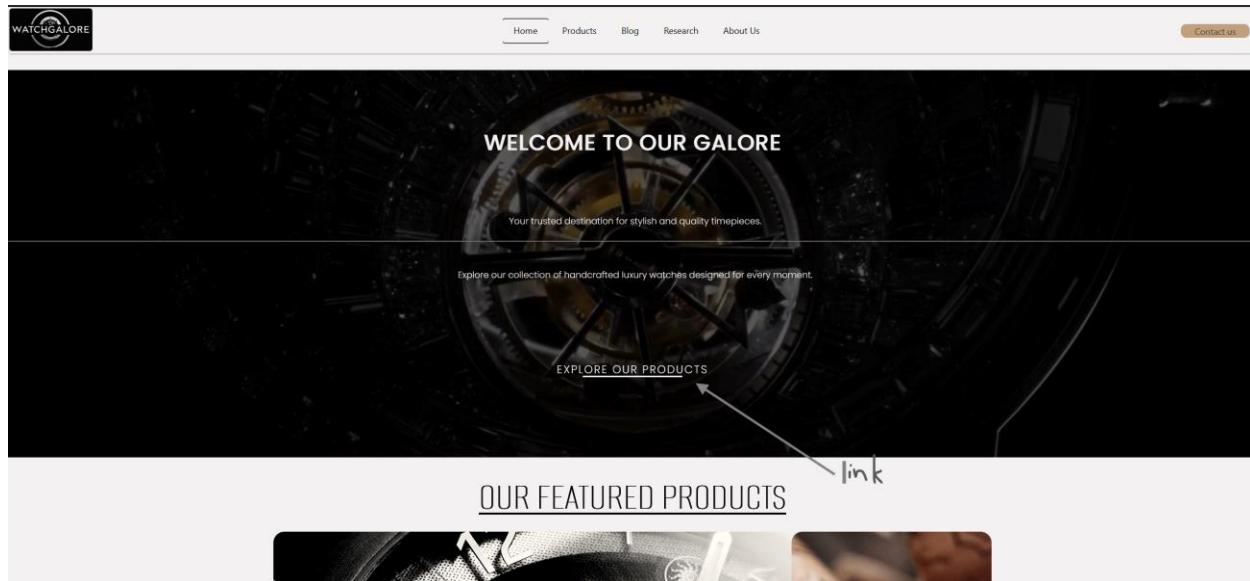

1. Internal link

Table 2:Test2

Test	Details
Objective	Internal link
Action	An internal link is clicked.
Expected Result	Redirect to an internal webpage(Home →Products) in the same tab
Actual Result	Redirected to an internal webpage(About us) in the same tab
Verdict	Test successful

Screenshots

Before:

After:

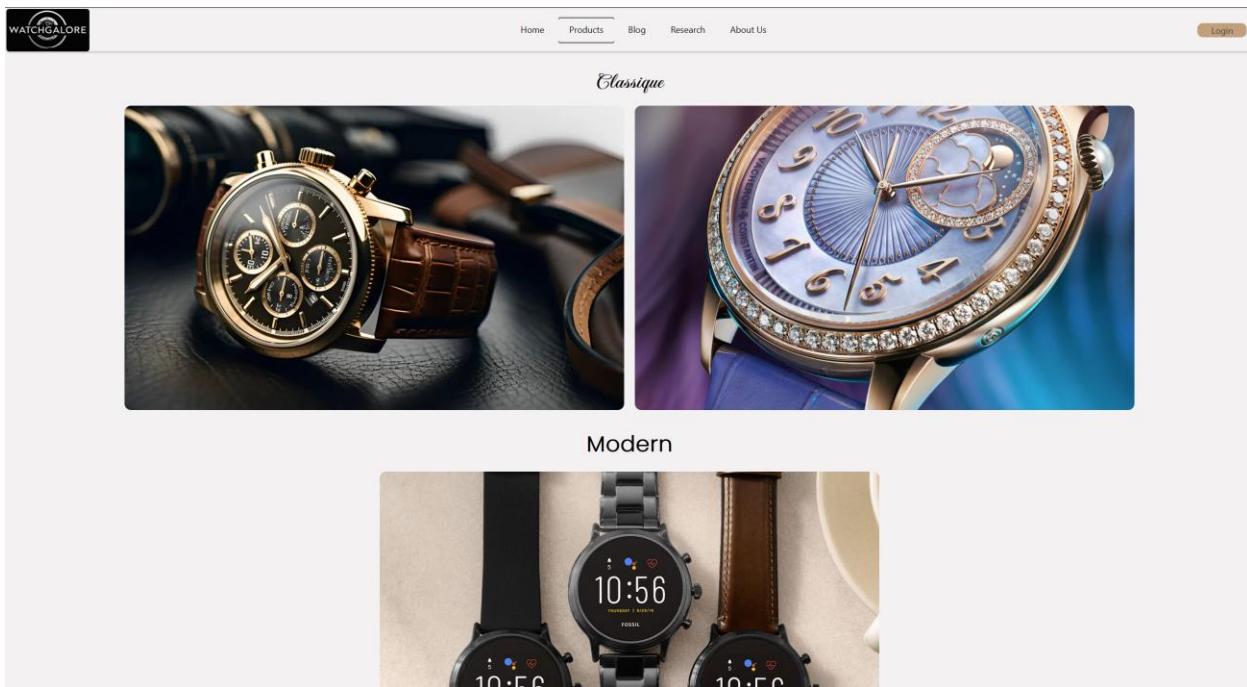

Figure 12: Test2(i)

2. External link

Table 3: Test2(ii)

Test	Details
Objective	External link
Action	An external link is clicked.
Expected Result	Redirect to an external website (research → Vacheron Constantin) in new tab
Actual Result	Redirected to an external website in the new tab
Verdict	Test successful

Screenshots

Before:

The screenshot shows the homepage of the Watch Galore website. At the top, there's a navigation bar with links for Home, Products, Blog, Research (which is underlined), About Us, and a Login button. A hand-drawn arrow points from the word "link" to the "Research" tab. Below the navigation is a large banner with the text "WELCOME TO OUR GALORE" and "OUR FEATURED PRODUCTS". To the right of the banner is a section titled "REFERENCED WEBSITE" featuring a dark, intricate image of a mechanical watch movement with the text "A 270-YEAR QUEST FOR EXCELLENCE". Below this is another banner with the text "DISCOVER OUR COLLECTIONS". A note at the bottom states: "We really loved the video being played when a user lands on the home page, so we incorporated same style of banner too".

After:

The screenshot shows the homepage of the Vacheron Constantin website. The header includes links for WATCHES, MAISON, SERVICES, and BOUTIQUES. In the center, there's a large, stylized graphic of a starburst or fireworks against a dark background. Below this is a banner with the text "270TH ANNIVERSARY" and "A 270-YEAR QUEST FOR EXCELLENCE", with a "EXPLORE" button underneath. The footer contains the text: "Vacheron Constantin's collections all illustrate the Maison's quest for horological excellence that it has pursued without interruption for 270 years."

Figure 13: Test2(ii)

3. Test 3: Form validation

Table 4:Test3

Test	Details
Objective	Validating form (Check for empty fields, wrong data)
Action	All details are filled with correct data
Expected Result	Form should submit successfully
Actual Result	Form submitted successfully
Verdict	Test successful

Action	Another member's photo (Subin) is clicked and while CV of one (Erick) is open
Expected Result	The CV should be switched accordingly.
Actual Result	The CV switched to a specified member. (Erick→Subin)
Verdict	Test successful

Screenshots

Before:

The screenshot shows the "MEET OUR MEMBERS" section of the Watchgalore website. It features four circular member profiles: Shahil Basnet, Erick Pradhan, Purnil Ghimire, and Subin Sapkota. An arrow points to Erick Pradhan's profile. Below this section is a larger "PORTFOLIO" area for Erick Pradhan, which includes his profile picture, name (ERICK PRADHAN, Full stack Developer), contact info (phone number +977 9817283909, email erik_pradhan@watchgalore.np, website www.watchgalore.np, LinkedIn www.linkedin.com/me, location Kathmandu, Nepal), a "PROFILE" section with a bio about exam admit cards, and a "SKILLS" section with progress bars for Java (~70%), Python (~70%), JavaScript (~90%), and HTML (~90%).

Conclusion

In conclusion, this project helped us all to develop our skills related to web development. We learned how to structure a website using HTML and CSS, added functionality using JavaScript and use them in a real world scenario i.e.(creating website).

The website was designed with functionality in mind, ensuring a smooth experience when a user browses through the site. The research page also emphasizes the importance of comparing industry standards to improve functionality and usability. While the most used tool was VSCode, Balsamiq was the real hero, by creating wireframes before coding, it saved a lot of time and reduced the hassle of designing layout.

We learnt a lot about different functionalities, properties of HTML, CSS and JAVASCRIPT and how they work together to make the web we access daily available to us. Working as a team made us feel the importance of being around people and dividing each tasks to each other according to one's strengths. This not only shifted the workload, it helped in social interaction, team bonding, and taught various leadership skills too.

Problems faced and how it was solved: There were various problems faced during the development of the website, such as the width of images being too much, positions not behaving correctly, scripts not running. We solved it by researching the problems and finding out what causes such types of problems really helped us in debugging future problems. For example: Our form was not being validated properly, the problem was some of the syntaxes were not written correctly which in turn made the script not work. After the syntaxes were corrected the form was validated.

How could the project have been better: The project could have been better if we could make the site responsive. We could also have made the site dynamic by using a database to store various information such as login information, storing feedback etc. Nonetheless, it doesn't mean we are not happy with our project. In fact, we enjoyed the challenges we faced when we had limited resources to develop the site.

Various tests were conducted to ensure the website was smooth and functioning as intended. Different tests and their outcomes have been documented which can provide more information about the site and its functionalities.

We researched a lot on UI/UX design principles, researched how other e-commerce sites direct their customers. It was found that these sites focus a lot on product pages as it's the main selling point and the whole point of an e-commerce site. We tried to incorporate lots of these design ideas and principles to our website too.

How Technology is Shaping the Future of Watches and Consumer Preferences

<div class="intro">

<div class="intro_paragraph">

<p>The watch industry, once rooted in tradition and craftsmanship, is now undergoing a remarkable transformation driven by technological innovation. From smartwatches to blockchain verification, technology is not only reshaping watch design and manufacturing but also redefining how consumers interact with timepieces.

Let's explore how this convergence of innovation and timekeeping is revolutionizing the industry and meeting evolving consumer expectations.</p>

</div>

</div>

</div>

<hr>

Smartwatches: Redefining Timekeeping

<div class="sub1">

<p>

Watches are no longer mere timekeepers—they've become digital companions.

Smartwatches have revolutionized the purpose of wearing a watch, combining utility with cutting-edge technology.

With features like fitness tracking, sleep monitoring, and smartphone integration, smartwatches cater to the needs of an increasingly connected lifestyle.

</p>

Shift in Consumer Behavior

<p style="text-align: right;">

Tech-savvy buyers, especially millennials and Gen Z, are gravitating toward watches that offer more than just aesthetics.

The ability to merge style with functionality has fueled the smartwatch boom, making them a staple in modern wardrobes.

</p>

</div>
<hr>

```
<h2 style="text-align: center;font-size: 38px;margin: 40px;">The Materials  
Revolution: Innovation Meets Sustainability</h2>  
<div class="sub1">  
    <p style="text-align: center;">  
        Watches are no longer mere timekeepers—they've become digital  
companions.  
        Smartwatches have revolutionized the purpose of wearing a watch,  
combining utility with cutting-edge technology.  
        With features like fitness tracking, sleep monitoring, and smartphone  
integration, smartwatches cater to the needs of an increasingly connected lifestyle.  
    </p>  
    <h3 style="text-align:center;color: black;margin: 40px;font-size:  
28px">Emerging Trend</h3>  
    <p style="text-align: center;">  
        Today's consumers value sustainability as much as quality. Brands that  
embrace eco-friendly materials or incorporate recycled components are winning over  
environmentally conscious buyers, aligning with their values.  
    </p>  
    </div><br><hr>  
<h2 style="text-align: left;font-size: 38px;margin: 30px;">Customization Meets  
Technology</h2>  
<div class="sub2">  
    <p>  
        Personalization has become a key driver in the modern watch industry.  
        Interactive platforms now allow buyers to design their watches down to the  
smallest detail,  
        from the dial to the strap, ensuring each piece reflects their unique style.  
    </p>  
    <h3 style="text-align:left;color: black;margin: 30px;font-size: 28px">Consumer  
Expectation</h3>  
    <p style="text-align: left">  
        The growing desire for individuality is pushing brands to offer customizable  
options, creating a
```

deeper emotional connection with their customers.

</p>

</div>

<hr>

>Retail Reinvented: AR and VR in the Watch Space</h2>

<div class="sub1">

<p>

Buying a watch is no longer limited to physical stores or static online catalogs. Augmented and virtual reality technologies enable customers to try on watches virtually, explore intricate designs up close, and even immerse themselves in brand storytelling

</p>

<h3 style="text-align: right; color: black; margin: 30px; font-size: 28px">Market Adaptation</h3>

<p style="text-align: right;">

With e-commerce dominating retail, AR and VR provide a digital solution that mimics the tactile experience of shopping in-store, enhancing buyer confidence

</div>
<hr>

>Authenticity Reinforced by Blockchain</h2>

<div class="sub2">

<p>

Counterfeit concerns in the luxury watch market are being addressed through blockchain technology. Digital records ensure authenticity and allow buyers to trace the ownership history of their timepieces..

</p>

<h3 style="text-align: left; color: black; margin: 30px; font-size: 28px">Luxurys New Standard</h3>

<p style="text-align: left">

The growing desire for individuality is pushing brands to offer customizable options, creating a

deeper emotional connection with their customers.

</p>

</div>

<hr>

<h2 style="text-align: center;font-size: 38px;margin: 40px;">The IoT Influence:
Watches as Connected Devices</h2>

<div class="sub1">

<p style="text-align: center;">

The integration of Internet of Things (IoT) technology is paving the way for watches that sync

with smart home systems and wearable ecosystems. These watches do more than tell time—

they communicate with the world around them.

</p>

<h3 style="text-align:center;color: black;margin: 40px;font-size: 28px">The
Connected Lifestyle</h3>

<p style="text-align: center;">

Modern consumers seek seamless integration of their devices, making IoT-enabled watches a

natural extension of their tech-filled lives

</p>

</div>
<hr>

<h2 style="text-align: center;font-size: 38px;margin: 40px;">Final Thoughts</h2>

<div class="sub1">

<p style="text-align: center;">

As technology continues to shape the watch industry, brands face a dual challenge: embracing

innovation while staying true to their heritage. The blending of tradition with technology is not

just reshaping the watches themselves but also the experiences they deliver. In this dynamic

landscape, the future of watches lies not just in keeping time but in keeping pace with the ever-

```
        evolving expectations of consumers.  
    </p>
